

Ideation Phase

Nutrition Assistant - Brainstorm & Idea Prioritization

Date	20 July 2026
Team ID	
Project Name	Nutrition Assistant Using MERN Stack
Maximum Marks	4 Marks

Nutrition Assistant - Brainstorm & Idea Prioritization:

This brainstorming session helps the team define practical, user-centered ideas for a Nutrition Assistant built with the MERN stack. Encourage diverse ideas for personalized meal guidance, nutrition tracking, food logging, and health-aware recommendations before evaluating feasibility.

Use this template to collaborate on the Nutrition Assistant concept, group related ideas, and identify the highest-value features for the first release.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Agricultural Crop Production Analysis using Tableau

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 🕒 10 minutes to prepare
- 👥 1 hour to collaborate
- 👥 2 Team Members

➡

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

A Team gathering

Define project roles and discuss project objectives.

Team Members

- Member 1 – Data Collection & Cleaning
- Member 2 – Dashboard Development & Documentation

B Set the goal

Develop an interactive Tableau dashboard that analyzes 25 years (1997–2021) of agricultural crop production data to identify production trends, crop performance, state-wise distribution, and yield insights to support government policy and research.

C Prepare resources

Before brainstorming, collect:

- Agricultural Crop Production Dataset (1997–2021)
- Tableau Public
- Microsoft Excel
- GitHub Repository
- Internship Documentation
- Previous Research Articles (optional)

Open dataset overview ➡

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

How might we analyze 25 years of agricultural crop production data to help policymakers, researchers, and farmers make data-driven decisions for subsidy allocation, crop planning, and yield improvement?

Key rules of brainstorming

To run an effective and productive session

- 👤 Stay in topic.
- 💡 Encourage wild ideas.
- 👂 Defer judgment.
- 👂 Listen to others.
- 🗣️ Go for volume.
- 👁️ If possible, be visual.

Step-2: Feature Brainstorming, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

Team Members

Siri Giddi

Bhadravathi Koppula

Areti Phaneendra

Bhargav Attili

Gangadhar Ganji

TIP
You can select a sticky note when the pool is unfocused which later you can develop.

Siri Giddi	Bhadravathi Koppula	Areti Phaneendra	Bhargav Attili	Gangadhar Ganji
KPI Dashboard	State-wise Production Map	Interactive Dashboard Design	Filters for State, Crop, Year	Season-wise Crop Analysis
Crop-wise Yield Analysis	Year-wise Production Trend	Mobile View Dashboard	Download Reports	Top Crops Ranking
Data Cleaning & Validation	Handling Missing Values	Story (Insights Narrative)	User-friendly Visuals	Production Distribution (By Unit)
				Export/Import of Crops
				Rainfall vs Production Correlation
				Cost vs Production Analysis
				Yield Improvement Insights
				User-friendly Filters
				Insights vs [Insights]
				Color-coded Insights
				Shareable Dashboard
				Automated Data Refresh

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and split it up into smaller sub-groups.

20 minutes

TIP
Add actionable tags to sticky notes to make it easier to find, review, organize, and make progress—especially ideas or themes within your must.

Cluster 1 Dashboard & Visual Design

KPI Dashboard
Interactive Dashboard Design
Mobile View Dashboard
User-friendly Visuals
Story (Insights Narrative)
Color-coded Indicators

Cluster 2 Filters & User Experience

Crop Type Filter
State Filter
Year Filter
Tooltips for Better Insights
Navigation Buttons
User-friendly Filters

Cluster 3 Production & Yield Analysis

Crop-wise Yield Analysis
Cultivated Area Comparison
Season-wise Crop Analysis
Top Crops Ranking
Yield Improvement Insights
Area vs Production Scatter

Cluster 4 Trends & Comparisons

Year-wise Production Trend
Compare Two States
Trend Forecasting (Next 5 Years)
Benchmarking States
Outlier Detection
Data Distribution Analysis

Cluster 5 Geographic Analysis

State-wise Production Map
District-wise Production Analysis
Rainfall vs Production Correlation

Cluster 6 Data Management

Data Cleaning & Validation
Handling Missing Values
Data Distribution Analysis
Automated Data Refresh
Data Quality Check

Cluster 7 Policy & Decision Support

Subsidy Allocation Support
Policy Decision Support
Cost vs Production Analysis
Export/Import of Crops
Crop Diversification Insights
Shareable Dashboard

Step-3: Idea Prioritization and MVP Scope Finalization

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.
